Core Surgical Techniques in Maxillofacial Surgery

A 3 day hands on workshop of simulated cadaver surgery

26-28 April 2013

Dept of OMFS, MSRDC

Learn the most common surgical techniques needed for Maxillofacial Head and Neck Surgery under the supervision of some of the most experienced surgeons in the field

This is a limited attendance course (maximum 20 candidates only) to allow one to one supervision.

Under the controlled environment of the fresh cadaver lab, candidates will be able to identify important anatomical structures and carry out simulated surgery without the fear of causing morbidity.

Course Programme

DAY1

Lectures on all the procedures- mainly 'how i do it' videos to tell candidates what to do over the next 2 days

DAY 2 & 3

Dissection on cadavers under supervision
Procedures

1. Tracheostomy
2. Bicoronal flaps and access to the TMJ
3. Parotidectomy
4. Neck dissection
5. Rib graft and Pec Major
6. Iliac graft and DCIA
7. Radial forearm flap
8. Fibula flap
