FROM THE

PRESIDENT

Dear colleagues,
Seasons' Greetings!

It's that time of the year when we all gear up to attend the biggest event of the OMFS Community – the AOMSI Annual National conference, and this year Team Indore has left no stone unturned to make this event one of the biggest and most memorable ones. I wish my best to the organizing team and all delegates for making the OMFS community a well knit and connected one year after year!

With this issue of Max-Facts I also take an opportunity to congratulate all state chapters that have organized upscaled events over the last few months. The state chapters have taken the quality of scientific events one notch higher and set a precedent which will be remembered with these fabulous events.

The calendar draws to a close for Max-Facts also. I congratulate the team for reviving Max-Facts and popularizing it amongst OMFS. The participation of the members in various sections of newsletter and the eager wait for next issues to update us with news and newsmakers is something that was a highlight of the year.

The coming year will hold new promises, and the post conference elected Head Office members will have the onus of continuing the legacy of bringing in new reforms and schemes for the betterment of the members. As I complete my term as the Hon President of AOMSI I thank each and every one of you again for choosing me and supporting me in all endeavors.

Jai Hind! Jai AOMSI!

Dr. Manjunath Rai

President, AOMSI

FROM THE HONORARY — GENERAL SECRETARY

Dear Colleagues,

I would like to begin by thanking each and every one of you for your continued support in my first year as Hon General Secretary, AOMSI. This has been a fruitful year with lots of scientific events, member centric programs and academic achievements. The dynamic team of MaxFacts- Dr. Mimansa, Dr. Purva, Dr. Shibani and Dr. Abhishek deserve accolades for bringing out

seven well compiled and thoughtful issues of newsletter. I express my hearty congratulations and encourage them to continue their good work.

Number of state chapter conferences were organised this year. It has been heart warming to see the passion among all our surgeons in working towards spreading awareness about maxillofacial surgery. Every state chapter has taken tremendous efforts and interest in organizing scientific and cultural events which allows hosts of speakers and students to showcase their work. The North east state chapter and the Odisha state chapters organised their first conference this year. It was a wonderful conference where stalwarts of our speciality shared their experiences. The inauguration of state chapters were graced by distinguished personalities such as defence officers, bureaucrats, technocrats, political leaders and ministers and King of erstwhile state of Mysore among others. Many celebrated maxillofacial surgeons were awarded with the life time achievement awards in the state conferences. Although I attended most of the meetings, I have missed a couple of them which I certainly will attend in the following years.

The 46th National AOMSI conference is going to be held at Indore under the leadership of Dr. Rajesh Dhirawani Organizing Chairman, Dr. Geeti Vajdi Mitra Organizing Secretary, Dr. Shaji Thomas Chairman, Scientific Committee and their excellent and enthusiastic team in Indore on 17th, 18th and 19th November 2022. I cordially welcome you all for the scientific and cultural extravaganza.

This year we also plan to don our region's traditional attire at the inaugural ceremony to commemorate the Amrit Mahotsava – 75th year of Indian independence.

Hoping to see you all in you colourful and vibrant spirits at Indore!

Let us celebrate our speciality by coming together, joining hands and taking our fraternity to greater heights and making Oral & Maxillofacial Surgery a household name.

Jai Hind!

Dr. S Girish Rao

Honorary General Secretary, AOMSI

FROM THE — EDITOR

Dear AOMSI members,

It gives me immense pleasure as I am writing down the editor's report for the academic year 2022. First of all, I would like to congratulate and thanks the previous editors for their sincere commitment, vision and hard work in bringing Journal of Maxillofacial and Oral Surgery among one of the best in specialty

journals worldwide. I was elected as Editor elect during 44th annual meeting of AOMSI at Bengaluru in 2019 and took over as Editor in chief during 45th annual conference at Mangalore in 2021.

Upgradations during the year 2022

This year, 4 issues of JMOS have already been published till October 2022. 2 more issues, Last regular issue of 2022 (October-December) and Abstract supplement issue for 46th Annual conference of AOMSI, Indore will be published very soon. The list of published issues are:

- **ABSTRACT SUPPLEMENT ISSUE - 45th Annual conference, Mangalore**
- **FIRST REGULAR ISSUE - JAN-MARCH 2022 - 47 Articles**
- **SECOND REGULAR ISSUE - APRIL-JUNE 2022 - 65 Articles**
- **THIRD REGULAR ISSUE - JULY- AUGUST 2022 - 46 Articles**

For AOMSI members, to read the full journal and access articles please log on to www.aomsi.com - go to member login - log in with your email I'd: password LM no@aomsi- click on the Journal tab- access articles. You can access all articles from 2009 onwards.

In pursuit of our primary objective to improve the readership and hence impact factor of JMOS, we have sectionalized the table of contents into following sections. For the first time, JMOS table of contents are arranged section wise for precise and interest-oriented readership. The April 2022 issue of JMOS was the first issue with section wise table of contents and it contained 65 articles. (Maximum number of articles in any issue till date). The distribution was as follows.

- **Oncology and reconstruction - 10 articles**
- **Cranio-maxillofacial trauma - 12 articles**
- **Cleft and Craniofacial surgery - 3 articles**
- **Orthognathic surgery - 9 articles**
- **Implantology and rehabilitation - 7 articles**
- **Dentoalveolar surgery - 9 articles**
- **Temporomandibular joint disorders - 6 articles**
- **Head and neck pathology - 9 articles**

The success of any scientific and academic journal is evident when it climbs up among the international consortia and indexing listings. So, the good news came in 2022, when according to cite score rank 2022 **JMOS has climbed up from 4th quartile to 2nd quartile SCOPUS**

INDEXING listings and ranking. This will attract top global research institutes to look up for JMOS for publishing their research in the specialty of oral and maxillofacial surgery. There was seamless transition of the editorial management software of Springer (Publisher of JMOS) for the previous team to the new editorial board. We have constructed the new editorial board with inclusion of new section editors, assistant editors, international editors, associate editors and some more high-quality reviewers.

The net total royalty for JMOS paid by Springer to AOMSI for 2021-22 in June 2022 is **28,54001.00 INR** which is the **record highest** till date. We have decided to come up with a **special edition issue every year** on any current theme based on global research and demand in oral and maxillofacial surgery. This year we are calling manuscripts for submission in a special edition issue on **“Reconstruction and rehabilitation of maxillofacial defects”** to be published in the month of March 2023. **Dr Julio Acero** from Spain (President European OMS) is the guest editor for the same.

Total no of articles submitted to JMOS till October 2022 are 530 submissions which are all time higher for any year till now. This is an encouraging news for the association. We hope to receive around 200 more submissions by the end of 2022. A new twitter account for JMOS in the name of @JMOS_Official has been created and our social media team along with editorial team is maintaining the account for promotion of the journal activities and updates. The same is being accomplished via Instagram and Facebook page for more reach and engaging the readership. We are starting with the regular research online webinar series from JMOS for the authors, researchers, readers, reviewers and Editors for better understanding of writing a manuscript, reviewing a manuscript and education of our members. We are in the process of collaborating with the editors of other international journals for sharing of knowledge and ideas for the same. Hopefully, by next month our first webinar series will commence.

We continue to move forward with dedicated and efficient team of editors, reviewers and authors. The goal is to strive for newer heights for JMOS in coming years.

Happy reading

Dr. Amit Dhawan

Editor in chief, JMOS

FROM THE
EDITORIAL TEAM

Dear Readers,

We begin this message with heartfelt gratitude towards all of you for being a part of our journey across issues over the last one year. Thank you for reading what we wrote and participating in the interactive sections we devised. Thank you for making MaxFacts a vital part of the OMFS news circuit.

The calendar has flipped pages again and the hustle bustle of the extravagant state chapter activities over the last few weeks have kept us all on our toes. In this issue apart from our regular sections we have covered the same to give you all a glimpse of AOMSI Pan India conferences.

The spotlight this month is on the Hon. President, Dr. Manjunath Rai, as he completes his term. Catch all his candid answers about personal and professional life in this issue.

With your support our regular sections of Talent corner, Mindroid and Fellowship centres are in situ. Our sincere gratitude to the participants, fellowship centres and alumni fellows for taking out time and sharing the details with us.

As we all pull our socks to meet at the 46th Annual National Conference in Indore, we wish you all safe travel and congratulate the organizing committee for organizing an event of such grandeur!

See you all in Indore,

Regards,
Team Max-Facts!

Dr. Mimansa Bhoj

Dr. Abhishek Bhattacharjee
Associate Editor

Spotlight Interview

Dr. Manjunath Rai

Dr. Manjunath Rai is one of the most popular faces in the OMFS Community. He has made a niche for himself as one of the most approachable, dedicated, and dynamic Presidents of the AOMSI. A graduate and post-graduate from A B Shetty Memorial Institute of Dental Sciences, Mangalore, he is active among his alumni circles and known as a friendly and skilled surgeon. Holding various posts in AOMSI, and taking up responsibilities and completing most challenging tasks also with diligence and commitment, he has been touted as one of the backbones in the growth of OMFS fraternity. A cheerful mentor, dancer and music lover, he is presently heading the department of OMFS at AJ Institute of Dental Sciences, Mangalore. The spotlight this month is on the Hon. President of AOMSI, as he completes his glorious term.

Questions?

Congratulations of completing your term as the President of AOMSI in a phenomenal manner! Please tell us about your growing years . What was your childhood like (family and schooling)

I come from a small town called "Puttur" which is around 50kms from Mangalore towards Coorg. I was born and brought up in the serene environment there. Though my Dad was a Government official and was getting transferred to different places, we were stationed in Puttur and all my schooling happened there.

On the family front, I have two elder sister and was the only son, thus I was a bit more pampered by my Dad. My mom was very strict and always wanted me to become a Doctor like her younger brother, who is a Cardiologist.

With parents and siblings

I did not qualify for Medical, so ended up joining for Dental.

I am blessed to be married to a companion like Anu, who helped me nurture my dreams and grow leaps and bounds with her support in my profession. We are blessed with two kids. My elder one, Bhoomi, is following my footsteps and pursuing dentistry from my alma mater, AB Shetty; and my younger one, Gagan is in 11th Grade, at "Expert" Mangalore. My father in law is Dr. Ajith Shetty, who is a leading Dentist of Mangalore. I could dedicate so much of my time to AOMSI over the years mainly because my family who were taking care of Clinic and Home.

With wife and children

Tell us about your graduation days.. Did dentistry happen as an accident or was it a choice?

I neither had the courage, nor marks to get into MBBS. Since my Mom always wanted me to become "Doctor", I joined Dentistry. None from my family members or relatives were Dentists, so I had absolutely no clue about the field encompassed. But once I joined, I started liking it because it required a lot of hand skill rather than only theory.

Questions?

When and how did you decide to become a Maxfacs?

While my graduation at AB Shetty was going on, the department of OMFS comprised of stalwarts like Dr. Kishore Nayak, Dr. Paul Salins, Dr. Shama Rao, Dr. Krishnamurthy, Dr. Rajendra Prasad and Dr. SM Sharma. Since 3rd year I looked up to these personalities and was fascinated by the kind of work they were doing, it seemed like a tough task and I thought it was a challenge I wanted to take up. The PGs in AB Shetty were posted at different centres for specialty training and MDS OMFS was a 3 year course even then (unlike others which were 2 year courses), which scared me but made me sure of trying harder and belonging to the world of OMFS.

With his team at AB Shetty

Please share an unforgettable experience or memory you have from your PG days?

While I was in MDS, we had peripheral postings in Thrissur under Dr. Varghese Mani in Government Medical College for Trauma and orthognathic surgery, and at Jubilee Mission Hospital under Dr. Adenwala for cleft

training. These Centre's were one of the highlights of my learning. I still cannot forget how fascinated I was, and still amazed at the speed with which Dr. Vargese Mani completed the orthognathic osteotomy in minutes. The way he would ask us to tap the osteotome with controlled force and teach us every step meticulously has helped us become the surgeons we are today!

What is the one thing that is different for today's budding Maxfacs from your time?

I can name a few.

- Study materials and Articles- we really had to move to different libraries to collect articles. Today information is accessible at the tip of your fingers to the present generation.

- It was compulsory to own SLR cameras for patients' record keeping. The biggest challenge before the digital era was that you are not sure about how good the photo which you have clicked. We had to wait for the entire film roll to finish before you expose them.

Alumni meet of AB Shetty

Tell us your most memorable OT experience

This one is from my peripheral postings at Dr. Adenwala's centre. On the second day of

Questions?

posting, he asked me to scrub in for a case and assist him. In a rush of excitement (normal for a PG going to assist the legend), I scrubbed in a hurry and reached inside the OT. On seeing me, come before allocated time he made me go back to scrub thoroughly and come back to assist. He then told me the importance of scrubbing well and how a few minutes of scrubbing were precious and should be adhered to. I still follow that, and try to instil the same in my students.

Operating with PGs

Who has been the biggest influence in shaping your career

Dr. N. Sridhar Shetty, my dean in A. B. Shetty Memorial Institute of Dental Sciences, Mangalore where I did my Undergraduate and Postgraduate education and later joined as a faculty (1989 to 2004) has been the biggest influencer in shaping my career.

He was very strict, at the same time very protective. He has the ability to make a very ordinary student into a very responsible person in life. I owe many of my well liked and respected traits to him, as he had a great

influence in moulding me into the professional I am today.

How did your involvement in AOMSI begin? What drew you towards the workings of the association?

My first AOMSI conference was in the year 2006 at Hyderabad as 2nd year PG student.

It used to be small gatherings at that time, where in everyone knew each other by name. My first election of AOMSI was in the year 2002 in Mumbai. I was very shy to ask for votes. I lost that election. I learnt my lesson. I never looked back after that.

with Dr. Shridhar Shetty

I should consider myself lucky to get elected unopposed as the Honorary General Secretary of AOMSI in the year 2010 at the age of 39. I had seen very closely the working of 3 past Hon. Gen. Secretaries Dr. Gunaseelan Rajan, Dr. George Paul and Dr. S. Prabhu. Dr. Kishore Nayak was very supportive and

Questions?

appreciated all the hard work. I had 6 dynamic Presidents in my two terms as the Hon. Gen. Secretary. Dr. Mustafa Khader, Dr. S. Prabu, Dr. George Varghese, Dr. Neelam Andrade, Dr. Sanjiv Nair and Dr. David Tauro. Each of them were stalwarts and guided me at every step.

Dr. Preetham Shetty, as an Joint Secretary has been a great help.

At the Golden jubilee torch run

Overall, i thoroughly enjoyed working for AOMSI. I spent a good amount of my time to AOMSI to bring out a lot of changes to the Association. Now when I look back, I can say “ it was worth it.”

You have held various posts across AOMSI, which role was the most challenging and why?

The post of Honorary General Secretary of AOMSI is a very responsible one and it was indeed challenging.

When I took over there was pending litigation on AOMSI. Though our society was registered under Pune Charitable Trust since the year 2000, paper works were pending till 2010. It took another 4 years to streamline the same.

The decision of making scientific papers to be presented by only AOMSI members in the

AOMSI conference in the year 2013 was the most difficult and challenging. Believe me, if our association has grown in Strength and Finance, it's because of that decision.

I faced many challenges such as updating of all our members records, promoting State chapters, revamping of our website, Separation of Election process from AGM, Drafting of Conference Guidelines and Constitutional amendments.

It was during this that we instated February 13 as OMFS Day (later International OMFS Day) and started Fellowships in Trauma and Orthognathic Surgery.

with the past and present hon gen secretary of AOMSI

You have been one of the most active Presidents in terms of attending conferences, introducing new schemes and trying to bring about radical changes, how did you balance work and personal life ?

I should consider myself lucky to have a very understanding family who let me spend so much of my (their) time for the association.

Every new member used to call me at least 3

Questions?

to 4 times during the process of membership. Before “A1 Logics”, it was my PGs who used to do so much work of AOMSI during EC meetings, AGMs and Elections. I am happy to see, most of those PGs have learnt Organizational skill along with surgery.

What, according to you, has been your biggest achievement as the President for the last term?

A parent cannot favour one child over another, similarly all that we have been able to accomplish alongwith my team in the last one year is a precious achievement. The Professional Indemnity scheme, Social Security benefits Scheme, Max-Fact monthly news letter, International Max Fax Day celebration, Online PG Orientation, Women’s day celebration, Inter-State video competition, Talent show, Online Masterclass , Fellowship in Cleft and Cranio-Facial and attending 14 state conferences are some of the accomplishments I feel grateful for.

Felicitation at KVG Sullia (former workplace)

If you could go back and do your term as the President again – rewind time- what is the one thing you would do differently?

Maybe I would relaunch the SSS in a different

way after ironing the creases. It’s a great initiative but facing challenges due to some unforeseen factors which we could not take into consideration. I would, if I could, work on them and relaunch the scheme.

What does “me time” mean to you? Any hobbies you enjoy?

Music and Dance!

I enjoy good music and listen whenever I am free or during travel.

I also like different forms of dance. I enjoy watching as well as perform various type of classical and semi classical dance form.

Fashion show with PGs

in his dance avataar

Questions?

If not an OMFS, you would have been a...?

May be a hotelier with Bar attached.
My wife is great cook and I am a good host.

What message would you give our fellow OMFS who look up to you?

The speciality of OMFS is very vast and vibrant. Our predecessors have taken the specialty and the Association to a great heights. Now it's your time and responsibility to continue the good work. Together we can and we will. "Don't ask what the Association is doing for me , instead ask what I can do for the Association and for the speciality?"

Quick Five:

1. One thing that makes your life worthwhile

The respect and the warmth expressed by my old UG/ PG students whenever and wherever I meet them.

2. What is your motto in life

"Be the change you want to see in the world".

3. If you could change one thing/ quality/ habit in yourself what would it be

My Anger Management

4. Biggest strength: Good Team player with Organizational skills.

Biggest Weakness: I trust people very easily.

5. What is your biggest regret in life

I don't have any regrets in my life.

Questions?

Favourite five:

1. Favourite surgery/ procedure

Pan Facial / Condylar Fracture ORIF

2. Favourite food or dish

Chicken Ghee roast.

3. Favourite place

"Om" My Home.

4. Favourite celebrity / role model

Narendra Modi / Dr. George Paul

5. Favourite AOMSI conference

Of course, 45th Annual National Conference.

with his role model Dr. George Paul

AOMSI Defense Chapter

AOMSI Defense Chapter conducted its first virtual conference on **"Oraland Maxillofacial Surgery in COVID -19 Scenario- An Analytical Approach"** from 18th and 19th Jun 2020 at Armed Forces Dental Clinic, New Delhi. Attended by more than 60 maxillofacial surgeons of the Armed Forces, this newly embraced digital approach unlocked new opportunities for member delegates across the country to update their knowledge during the ongoing COVID-19 pandemic.

Continuing with trend of virtual presentation, 2nd virtual conference was held on 18th Sep 2021 on **"Virtual Surgical Planning & Patient Specific Implants In Maxillofacial Surgery"**. The CDE helped the maxillofacial surgeons of armed forces to frame out precise treatment plan for patient requiring correction of complex craniofacial congenital and oncologic deformity and orthognathic surgeries.

Armed Forces Dental Clinic, New Delhi successfully conducted first ever multispecialty hybrid CDE (virtual and hands - on) programme on **Maxillofacial Infections : Past, Present, Future : A Paradigm** on 22nd Jan 2022.

The AOMSI fellowship program aims to train young OMFS who acquire adequate knowledge at the end of their residency but would need more Hands-on opportunities and skills to independently manage a variety of cases in different sub-specialties of Maxillofacial surgery.

The first AOMSI fellowship exam was conducted in Vijaywada, during midterm convention in 2015, for Trauma and Orthognathic surgery fellowships. AOMSI, currently offers fellowship in 3 sub-specialties - **Maxillofacial trauma, Orthognathic Surgery and Oral Oncology.**

The trainees are shortlisted after qualifying a national level examination. The selected trainees undergo an interview. The AOMSI fellows are paid an educational grant/ stipend during the course of their fellowship. The duration of the training is for a period of one year.

The following section in Max-Facts is dedicated to highlight about the features of the fellowship centres of AOMSI. Every month two centres will be featured along with an interview of a fellow who has had a first hand experience of working at the centre.

For more information regarding the AOMSI fellowship, log on to - www.aomsi.com

AOMSI - CRANIO MAXILLOFACIAL SURGERY

Amrita Institute of Medical sciences, Kochi

Program director:
Dr. Pramod Subash

Other faculty in the department: **Dr. Arjun Krishnadas, Dr. Shibani Nerurkar**

- Cleft

Orthognathic

Reconstruction
- Pathology

TMJ

Miscellaneous

GA 2020 - August 2022

1. A tertiary health care center treating full spectrum Craniomaxillofacial Surgery that spans craniofacial, orthognathic, cleft, trauma, pathology, reconstruction, aesthetic, orthognathic, TMJ and dental implants.
2. CMFS unit is an Integral part of the Head & Neck / Plastic & Reconstructive / CMFS multidisciplinary team that functions under one umbrella
3. Access to and availability of equipment's like Robot, Intra operative CT scan, Intra operative Navigation.
4. In house Virtual Reality, 3D printing and virtual planning lab with dedicated CAD engineer, and access to planning software like Materialise Proplan / Dolphin 3D.
5. In-house Cleft & Craniofacial orthodontics, Maxillofacial Prosthodontics, Hospital Dentistry and Dental Oncology specialties' work along with the CMFS unit.
6. Meticulous pre-surgical planning with weekly case discussions leading to multidisciplinary patient management and comprehensive patient care.
7. Apart from routine orthognathic surgery, the unit is one of the leading centers of craniofacial surgery India teaming with the pediatric neurosurgeons, provides full spectrum cleft surgical care along with In-house Nasal endoscopy, VFS and speech / swallowing specialists, performs full spectrum of TMJ surgery ranging from Arthroscopy to open joint surgery and Total alloplastic replacement of TMJ, as well as cutting edge reconstruction aided by virtual surgical planning, intra operative CT / Navigation and use of patient specific implants.

AOMSI

FELLOW PERSPECTIVE

Dr. Shibani A. Nerurkar

Year of joining fellowship program: January 2021

Working now at: Amrita Institute of Medical Sciences

nerurkarshibani@gmail.com

Describe in one word your time at the fellowship centre?

Reframing

Your learning experience at the centre?

My one and a half year at the center has reframed my approach towards the patient management. The center gives a comprehensive exposure to the entire spectrum of Cranio-Maxillofacial surgery including trauma, pathology, orthognathic surgery, reconstructive and plastic surgery, implants, cleft, craniofacial surgery and oncology. It gave me an opportunity to learn and do virtual surgical planning, pre-plan surgeries on stereolithographic models and taught me to have a multidisciplinary approach.

Briefly describe a typical day at the fellowship centre?

Typically, the day would start around 7:30- 8 am with patient rounds followed by OT which usually start by 8 am and end as per the cases. On OPD days, OPD starts from 9am and goes up to 6 pm which is 3 days a week. Cases which are combined with other departments usually get posted on the OPD days and are managed accordingly. Every monday mornings, there are case discussions over the cases to be operated over the coming week and on Wednesdays there are visual surgical planning sessions.

Myself with Dr. Pramod Subash

Myself operating in OT

What did you learn beyond OMFS?

Beyond surgery, it has taught me to work as a team, respect others opinion and not to hesitate to ask for help from other specialties.

How did the fellowship program help you?

My fellowship has not only enhanced and taught me new surgical skills but has also helped me to preplan, understand the possible complications and prevent or manage them as needed.

Your advice to the young OMF surgeons?

My advice would be there is a lot to learn in OMFS and so observing or assisting different surgeons at any stage is always helpful and the field thus test your patience so hold on tight.

Hannah Joseph Institute of Neuroscience & Trauma

Dr. MJ. Arunkumar, M.Ch.,DNB.,
Chief Consultant Neurosurgeon
Chairman and Managing Director
Hannah Joseph Institute of Neuroscience & Trauma

This has been the sixth year after the post MDS fellowship programme for specialisation in Craniofacial surgery at the Hannah Joseph hospital, Madurai. This gives a good exposure for a combined treatment specially for Craniofacial trauma. The maxillofacial surgeons do get to see patients with Craniofacial injuries and learn treatment protocols in terms of surgery & also the follow on intensive care management at our institute... They are posted in our Neurosurgical ICUs and wards where they get a rich experience in treating a combined Cranial & Maxillofacial injuries apart from the other skull base reconstructions and tumours. I appreciate the efforts of Dr. Venkadasalapathi, the director of the course in our hospital who continues to train doctors in this highly specialised field along with our team of Neurosurgeons / Neuro Anesthetists, Neuro radiologist & Rehabilitation Consultant. We take pride to say that we are using Navigation (Brainlab) to perform highly complex Maxillofacial fractures and tumours! I wish the very best for the team to reach greater heights!

Course Director
Dr. N. Venkadasalpathi, MDS, FIBCSOMS.,
(Oral and Maxillofacial Surgeon)

Did his post graduation from Tamil Nadu Government Dental College, CHennai passed out in the year of 1999 March as a Gold Medialist from prestigious T.N. Dr. MGR Medical University. 23 years of surgical and teaching experience trained and performed various Facial Translocation Procedures since 2007. Expertise in performing Orbital Reconstructive at Indo - Japan AOMSI National Conference - 2018.

A Comprehensive tertiary care centre that offers an exceptional experience for our trainees. Evidence based surgical practice, for all the patients we take pre and post op CT and Clinical documentations. Round the clock we have in house 4 neurosurgeons, 2 Neuroanesthetist, 3 Intensivist. We practice navigation guided surgeries. Our centre gives greatest oppurtunity to learn and practically to handle critically ill (Neurotrauma) patients.

Year of Commencement of AOMSI fellowship: 2017

Craniofacial and Maxilofacial Consultant Surgeon, Birminham, UK

AOMSI

FELLOW PERSPECTIVE

Dr. Vijayalakshmi Padmanaban

Year of joining fellowship program: 2022 - 2023

Working now at: Hannah Joseph Institute of Neurosciences & Trauma - Madurai

www.vijupadha@gmail.com ✉

9677190008 ☎

Describe in one word your time at the fellowship centre?

EFFICACIOUS

Your learning experience at the centre?

This centre gave me an opportunity to handle surgery using advanced technologies which made me more engrossed in surgery. Its a unique centre in India where we have a Brain Lab navigation Unit and we often used to do Navigation Assisted Orbital Floor Reconstructions, Skull base surgeries, Neurotrauma, Complex Spine Trauma Surgeries, Navigation Guided Brain tumor Resection, yellow Fluorescence Guided Brain biopsy, Neuro-Pathology, Intraoperative Neuro-monitoring (IONM), and Intraoperative Ultrasound Guidance. We used to do various Percutaneous Interventions of the Head and Neck, Ballon - Assisted coil embolization, Flow Divertors (FD) for Aneurysm / AVM. We also do ICG / Flow 800 guided Aneurysmal Clipping. Great respect and thanks to my Director **Dr. N. Venkadasalpathi**, MDS, FIBCSOMS., (Maxillofacial surgeon) for guiding me throughout the journey and thanks to **Dr. MJ. Arunkumar** M.Ch., DNB Chief Consultant Neurosurgeon, Chairman and Managing Director, Hannah Joseph Institute of Neuroscience and Trauma, **Dr. R. Veerapandian**, M.S.,M.Ch., (Neurosurgery) **Dr. K. Senthil Kumar**, M.S.,M.Ch., DNB (Neurosurgery) **Dr. Ganesh** M.B.B.S, M.Ch., (Neurosurgery) **Dr. N. Arunkumar** M.D., BND, PDFC (Neuro Anaesthesiology), **Dr. Ramashankari**, M.D., PDCC., (Neuro Anaesthesiology) **Dr. G. Satheesh**, M.B.B.S., DMRD., M.Sc., FINR (Interventional Vascular and Neuro Radiology) **Dr. Kamal Rathinam**, MDRD., FVIR (Vascular and Interventional Radiology) for being my constant support.

Briefly describe a typical day at the fellowship centre?

The day starts early at 7am in Neuro ICU, followed by patient rounds, OT, OPD's, Post Operative patient care, Minor Surgical Procedures ends with surgical planning and case discussion.

Any particular anecdote which you would like to share with us?

The incident which comes to my thought when I go back into the memories were first time of the Navigation Surgery trauma case handled and award winning moment. Felt Goose Bumps when I held the wand for assisting navigation surgery. The award won during the fellowship program for the paper presentation was the most thrilled and happiest moment for me and I believe that it would have not happened without the support and guidance from my director **Dr. N. Venkadasalapathi & Dr. Rswari Venkadasalapathi**.

What did you learn beyond OMFS?

Beyond OMFS, this program helped me to learn how to handle neurosurgical patients, it also improved my communication skills with the patient and gave me a new perspective about my carrier.

How did the fellowship program help you?

Confidence in dealing with the complicated surgical procedures.

Your advice to the young OMF surgeons?

Fellowship is a great platform, use it wisely.

Myself in the OT

Myself operating in OT (under his observation)

Myself with Dr. MJ. Arunkumar & Dr. N. Venkadasalapathi

Centre of excellence

**Do you want to be featured
as a centre of excellence ?**

**A shout out to all OMF surgeons
to get featured on Max-Facts!!**

- Are you working at a high volume centre ?
- Are you willing to train young OMF candidates ?
- Is your centre open to inviting candidates
for observership or fellowship?
- Are there opportunities for research at your centre ?

If it's a "YES" write to us at "maxfacts@aomsi.com" &
we will feature your centre of excellence
in our upcoming issues!

Let's join hands to learn better and grow together!

Down:

1. Hormone that causes hairloss in genetically susceptible patient.
2. It is a routine ophthalmological procedure that measures the angle between iris and the cornea.
3. The other name for swinging eyelid incision.
4. Superior oblique muscle is supplied by this nerve.
5. Lahshal classification of cleft lip and palate was given by ?

Across:

6. This type of closure is done to reduce doner area scar in hair transplant surgery.
7. occassionally cleft of lip and alveolus may have bands of soft tissue bridging across the two sides which are called ?
7. It can be a cause of habitual dislocation of the mandible.
8. Growth phase of hair follicle is called ?

MINDROID CORNER

1. Name this incision.

2. Fracture of the orbital floor with intact orbital rim is called ?

3. What forms the Orbital roof ?

4. Name this instrument ?

5. Medial Border of the infratemporal space is formed by ?

6. Name this instrument?

7. An area of delicate loose connective tissue that lies between the alar and prevertebral fascia , extends from base of the skull to the media stinum ?

8. Lefort 3 fracture is also know as ?

9. Name this technique of cleft lip repair ?

10. Modern percutaneous tracheostomy was developed by ?

■ Submit your answers for quiz & crossword to maxfacts@aomsi.com by 15th December 2022.

■ Answers for mindroid will be revealed on our social media handles along with a shout out to those who send in correct answers.

poetry

Here I am passing through the times of life's stories
gaining access in whims of circumstances,

neither i knew nor was told about the future unfolding
my ways designed to a destiny my thoughts accrued scaffolding

nothing was there on this platter '
until I filled it with my dreams to glitter

my knowledge uploaded my skills unfolded
grooming faces plenty relieving them of their miseries as told

my bread and butter were in my hands to perform
as and when perfection was to conform

many a time reaching out to the masses
humanity I encompass

my heroic endeavor knew no boundary
my effort and strength were passed on to the beneficiary

learned many a lesson
success and failure are even

shrug not in despair when voices hurt
for it's their opinion that's all it meant

jealousy, hatred was there to bypass
professionalism was bound to cross

heal thyself before healing others
all that glitters will wither

nothing stays name fame and money
what gathers will go away, honey

Fill yourself with love and laughter
that's the way you become smarter

To sail through phases of life
you need to balance all your strife

Dr. R.M.Lalitha (LM 6737)

TALENT CORNER

poetry

D - हर दिन एक नई उमंग लिए,
चले जाते थे कुछ नए रंग लिए;
मलि गए यहाँ उन रश्मितों से,
ज़िन्दगी भर चलना चाहते हैं अब जनिको साथ लिए.

M - ज़िन्दगी में कतिने हसीं लम्हे आये,
वो हर लम्हे को मैं चुराने चाहूंगा;
याद आएगी वो यारियाँ,
उस यारी पे मैं कुरबान होना चाहूंगा.

D - वो लोग हमेशा याद आएंगे
जीनोने प्यार नभिना है सखाया,
दोस्त क्या होते हैं, मालूम तो था हमें;
लकिन दोस्ती के बारे में हमें इन्होंने बतलाया!

M - वो कल की ना सोच आज हमने जिया है,
बड़े मुकाम पे पोचने की शदिदत को पिया है;
ना गम है यारो आने वाला कल जो भी लता है,
क्योकी हमने तो दोस्ती के जाम को पिया है.

D - वो पहले दिन की यादे,
अंजानो के साथ की हुई बातें;
कॉलेज के पहले साल में की हुई शैतानियाँ,
याद रहेगी फ्रेशर्स के टाइम कएि हुए वादे.

M - ना जाने कब autoclave का swag शुरू हो गया,
Pink या purple पे भी प्यार आने लगा;
दोस्ती की थी pharmacology से,
ना जाने कब ADR आने लगा.

D - 2nd year से पच्छा यह छुटा,
3rd year ने आके बम फोड़ा;
तीन वर्षियों बोल के final year का कोर्स करवाडाला,
मरीजों के लिए भी बहुत पसीना नचोड़ा.

M - जिसको बोले आंधी है उसकी बारी आ गई,
समय पर ना quota पूरा term end pending रेह गई;
अब तो only इंटरनल मार्क्स ही बचाए हमें,
उसमे भी attendance की कमी रह गई.

Dr. Murtaza Contractor (SLM7114)

Life - a paradox

**Always running like a train is departing
The soul we try to train is just crushing
One moment the emotions are high on sky
And the coin flips and you are aside to die
Underside your own mind, the one that chatters unknowingly
The heart that trembles pushing your will flowingly**

**Trying to take charge in conscious mind is Easy to imagine
But the heart overpowers the subconscious bird with a grin
The fight inside for the unrequitable love is hard to tackle
Mere thought of his is all needed to re-tickle
All the goose-bumps inside your head start popping
Demanding a quick rush of love and Tempting**

**No matter how intellectual you seem to be
No matter how hard your body feels to be
From outside you may be a perfectly bitter soul
But the roller coaster inside keeps rolling**

Dr. Monika Surana (LM 5374)
