FROM THE PRESIDENT

Dear colleagues,
Season's Greetings!

With another issue of our official newsletter doing the rounds, I am obliged to get this opportunity to thank you all for showing faith in the AOMSI professional indemnity scheme and registering in such large numbers. We are happy to launch schemes that can benefit the members of the association in their professional and personal arenas.

Our previously launched scheme, social security scheme, has started the top-up of policy post-disbursement. To keep your membership of good standing, I appeal to you all to please top-up in time.

It has been an immense matter of pride as our fellow OMFS, Dr. Manik Saha, became the first OMFS and Dentist to become Chief Minister of a state in India. AOMSI wishes Dr. Saha, the CM of Tripura, all the very best in this endeavour.

On the international front, we congratulate Dr. Gunaseelan Rajan, for becoming the Hon. President of the Asian Association of Oral and Maxillofacial Surgeons. It is indeed a very proud moment for our country and colleagues to witness international acknowledgement of our OMFS community and talent.

Last month witnessed the meticulously organised "MASTERCLASS". In depth lectures, exam oriented discussions and doubt clearing sessions to ensure that every PG is exam ready. My best wishes to the Post graduates and congratulations to the Masterclass committee for organising this flawless event. To top up, this month, the Indocleftcon was another very well organised multi-disciplinary congregation aimed at improvising cleft-care in India.

As the covid scare and number of cases decline, we are looking forward to the next "offline" conference coming up in Coimbatore – the Annual PG Convention and Midterm Conference.

See you all at Coimbatore!

Regards,

Dr. Manjunath Rai
President, AOMSI

FROM THE HONORARY — GENERAL SECRETARY

Dear Colleagues,

It gives me immense pleasure to write to you all through the MaxFacts portal. Firstly, I am extremely delighted to share with you all that our association has received the registration under Section 12AA and 80G of Income Tax from 1st April 2022.

Benefits of this include:

- Income will be exempted from taxation from the current year.
- Our association becomes eligible to receive government, foreign and various private sector grants(CSR- Corporate Social Responsibility)
- Benefits of FCRA Registration.
- A donor can avail of deduction from their taxable income.
- Attracts the donor to make a donation.
- Getting an 80G Registration also facilitates seeking foreign contributions.
- Only an NGO with both 12A and 80G registration is eligible for government funding.
- As a society by law, 80G registration gives our organization a promising prospect, enhancing its goodwill and the confidence of those associated with us.

With these benefits, we hope to raise funds to strengthen our resources and work in the direction of providing treatment to those affected by diseases such as mucormycosis and Oral cancer, increase the number of fellowship centres and thereby, increase the fellowship opportunities for our enthusiastic youngsters. This herculean task has been possible with the tireless efforts of my predecessors, the previous Presidents, Secretaries, Treasurers and EC office bearers. In this regard, if anyone of you, through your personal acquaintances, wish to bring in resources, please feel free to contact me.

I would also like to take this opportunity to congratulate Dr. Manik Saha on being elected as the Chief Minister of Tripura. Dr. Saha, having completed his masters in Oral and Maxillofacial Surgery from the King George's Medical College, Lucknow, is the first among the our fraternity to ascend to the Office of Chief Minister. I wish Dr. Saha hearty congratulations and wish him a great tenure as the Hon. Chief Minister of Tripura. I would also like to congratulate Dr Gunasheelan on taking over as the President of the Asian Association of Oral and Maxillofacial Surgeons.

It brings great delight to me to see the members of our fraternity take active role in various scientific and clinical conferences. The recently conducted Workshop on Craniosynostosis in NIMHANS, Bengaluru, Triple O conference in Salem, National Conference on 3D printing in Hyderabad and Indocleftcon in Kochi gave many of us opportunities to interact among the best in the business and also to hone our skills. My heartfelt appreciation to those who strived hard to makes these events a success.

Let us celebrate our specialty by coming together, joining hands and taking our fraternity to greater heights and making Oral and Maxillofacial Surgery a household name.
Jai Hind!

Dr. S Girish Rao

Honorary General Secretary, AOMSI

MESSAGES

FROM THE — EDITOR

Greetings from journal of maxillofacial and oral surgery!

The academia in the field of oral and maxillofacial surgery is expanding as we are getting more and more articles from different parts of the country as well all over the world. So I feel it's the time to give our readers a topic oriented issue of journal of maxillofacial and oral surgery.

Among the 4 regular issues of JMOS, we have decided to make 4th issue (October- December) issue as a special issue. So I am happy to announce the special issue would be on RECONSTRUCTION and REHABILITATION of MAXILLOFACIAL DEFECTS , which will be published in the month of December 2022.

The Manuscripts are invited for submission specifically on reconstruction and rehabilitation, mucormycosis defects, virtual surgical planning, soft tissue and hard tissue reconstruction, patient specific implants etc.

I hope this will give an opportunity to our readers and authors to attain a state of the art knowledge about the reconstruction and rehabilitation of maxillofacial defects in a systematic way.

On the other hand, the new online issue (January -March 2022, volume-21, issue -1) of Journal of Maxillofacial and oral surgery (JMOS) is also published. The table of contents and Springer alert has been sent to all the members on their respective registered emails ID's.

The highlights of this issue are:

47 articles; 295 pages

One invited review and 3 other review papers

- 3 : Clinical papers
- 2 : Comparative studies
- 21 : Original articles
- 15 : Case reports and
- 2 : technical notes

I wish all readers will find uplift in the existing knowledge in literature after reading this issue of JMOS.

For AOMSI members , To read the full journal and access articles please log on to www.aomsi.com- go to member login - log in with your email I'd: password LM no@aomsi- click on the Journal tab- access articles. You can access all articles from 2009 onwards.

Happy reading.

The online link to access journal issues is provided here.

Happy reading

Dr. Amit Dhawan

Editor JMOS

FROM THE
EDITORIAL TEAM

Dear Readers,

First of all, our team would like to thank you all for all the love and blessings you showered upon us for our last issue! Thank you!! A newsletter is only as worthy as the love of its readers, and you all have made our efforts in compiling worthwhile

In this issue we continue to talk about the journey of our first lady president of AOMSI, **Dr. Neelima Malik**, along with a coverage of the various conferences and events that have taken place since our last issue.

The Fellowship centres featured are **Max super speciality hospital and Nangal cancer hospital and research centre**. **Dr Gaurav Popli** has submitted **Synergy Institute of Cancer Care and Research** centre as a centre of excellence and shared the details of the centre and work done with all our readers. We request all our readers to please write to us if you want your centre to be featured as a “centre of excellence” in our upcoming issues.

The spotlight in this issue shines upon **Dr. George Paul** as he walks down the bylanes of memory and tells us how dentistry and law coexist in his universe and gives tips to practitioners to be medicolegally safe.

Dr. Praveen Ganesh features in our Beyond OMFS section to tell us how diverting punches has given him the right “kick” in life!

Our mindroid corner is once again ready to help you exercise those grey cells, alongwith the upcoming events to plan your calendars for your regular updates in the world of OMFS.

Happy Reading!

Regards,
Team Max-Facts!

History & update on AOMSI 12A / 80G

The idea of having the 12A for AOMSI was first conceived by Dr. Krishnamurthy in 2014 following which the then - President Dr Sanjiv Nair and Hon. Gen secretary, Dr. Manjunath Rai appointed Dr. Pritham Shetty to look into the issue and compile a report.

Report:

We had a lawyer at Pune through whom we used to file the audit report in Pune Charity commission. Just to get an appointment and meet him used to take hours in those days. Dr. Manjunath & Dr. Pritham had tough time even to connect with him over a phone call.

Some random information that were being passed around at that time:

- 1) We have been filling income tax with charity commission of Pune.
- 2) We never paid tax since we were told exempted.

And with every change of auditor from new term of office bearers, there was a missing information of the past.

Therefore following changes were recommended:

To have an auditor in Pune who will file IT returns as per the law and submit audit report to charity commission office in Pune.

Dr Pritham's local contact Mr Nitin Shetty introduced us to Mr Rajeev Kulkarni, who as the discussions progressed turned out to be the auditor who registered AOMSI as a trust under charity commission.

At the AGM of Ahmedabad it was decided to appoint Mr Kulkarni as our official auditor.

We were required to submit financial documents during the period 2011- 2016 to apply for the 12 A, that included not only head office accounts, but every financial activity conducted using AOMSI pan including national and state conferences, or workshops, MASTERCLASS etc .

The task was huge and daunting as we had to coordinate with all organisers to collect details . PAN number of all traders who participated in conferences, audit reports of workshops that gave a part of their profit to AOMSI as a good gesture, requests from auditor were continuous. By Nov 2017 we could get the first document file ready for auditor to file the application.

In the process, we also realised that GST is a must and act of compliance can result in huge fines. Hence at Nagpur AGM got approval to apply GST for AOMSI was obtained and membership fees was revised accordingly.

In this regard we need thank Dr Deepak kulkarni - senior member for agreeing to use his clinic address for GST registration.

Additionally, AOMSI PAN was being used widely and it was difficult to trace activities in various accounts held by state chapters with different banks.

To bring clarity and set up a system and process, an all state secretary and treasurer meeting was organised at Mumbai by Dr Pritham & Dr Pramod, where it was decided to have "One bank / One Pan for all state chapters and conferences. It was also decided to have an income account and a different expense account. As per the advice of our auditor, in 2018 Dr Pramod started the process to close all the existing state chapter accounts and opening new state chapter and state chapter conference accounts in one bank . It was an uphill task.

We filed for 12A with the charity commission in 2018 with retrospective effect from 2011.

Once the scrutiny of application started we started getting notices to explain transactions related to different conferences, accounts etc. Some information was impossible to obtain as it dated back to 2010 Coimbatore conference. Next 4 months was spent on collecting information replying to all notices.

Rule states that if the 12A application is not rejected within 6 months of submission, it's accepted as Deemed permission, just one week before this period our file was rejected in a hurry without proper assessment, and we filled an objection. We got a person to represent the case with Dr Pritham and Mr Kulkarni. During the hearing, judge asked questions about our fellowship programs and different activities that AOMSI undertook. They made fun about our conference expenses and the profit and on a lighter note someone said these surgeons drink a lot during conferences. However, our representative did well and the matter was sent back to charity commission for re-examination and consideration.

Dr Ramdas needs a thankful mention here as he introduced a judge in charity matters who in turn guided us very well in the process. Our file was reassessed multiple times and we were asked to meet to give clarifications. In March 2020 we got date for the final meeting with commissioner and then we were told he will make the final decision in this matter. That's when Covid struck and whole World went in to lockdown, which delayed our hearing. Later, govt ruled that all pending application will be reviewed online and our online review was done in August 2021. After this we received notice to pay tax and penalty for the period 2011- 16, which was challenged again in the court by paying 20% of the fine as a deposit.

Last month we received again a communication to re-apply, following which the new order of provisional registration of 12A for AOMSI (for FY 2022-23) has been awarded. This will be renewed on a yearly basis, dependant on the compliance of financial matters with regulations laid out by the charity commission.

The matters pertaining to 2011- 2022 are still under contention and fight is still on make the registration retrospective, which if and when done will clear all penalties and fines of the past.

Along with 12A, 80G was awarded, which means we can accept donations and the donor will have 50% tax exemption.

Apart from this our Auditor is registering our association for CSR - (Corporate Social Responsibility) once we register & get CSR no, then we can accept donations from corporate companies & wherein they are benefitted with 100% tax exemption.

AOMSI is now 100% tax free, provided we comply with regulations of charity commission. The entire financial system of AOMSI that has been setup in the past few years will have to be followed strictly (and modified as situation demands) by the HO, all national & state conferences, SSS, Foundation, IBOMS and state chapters.

Though the major contribution is by Dr Pritham & Dr Pramod

This wouldn't have been possible without constant encouragement and help from Dr Neelakandan, Dr Philip, Dr Krishnamurthy, Dr Veerabahu, Dr Manjunath Rai , Dr Sanjiv Nair , Dr Prabhu, Dr Deepak Kulkarni, Dr Rajesh Dhirawani Dr Mustafa & All the state secretaries, state treasurers , conference organisers played a very important role submitting documents multiple times. Past treasurers Ashish and Philip helped us giving information of their tenure .

Last but not the least our auditor team Mr Rajeev Kulkarni / Ms. Amita Kulkarni Mr Marc D'Souza and Mr Joby who has burned midnight oil to meet deadlines and bring about a positive outcome in this matter.

Immense thanks to Dr. Pramod, Dr. Pritham & Dr. Manjunath Rai for helping in compelling this note.

Regards

Dr. Rajasekhar Gaddipati

Hon. Treasurer

Conversation continues with the **First Lady president of AOMSI**

Dr. Neelima Anil Malik

As an Oral and Maxillofacial Surgeon what are your areas of clinical interest ? What clinical support did you garner during this journey?

My areas of interest are TMJoint ankylosis, Orthognathic surgery , Distraction osteogenesis, Oral sub mucous fibrosis care, Benign tumours of the jaw and of course trauma care.

We used to operate minimum two cases in a week, of TMJ ankylosis, because of excellent ,expert anesthesia Dept of Nair medical, who had mastered the technique of blind awake intubation, without doing tracheotomy. I thank Dr. Mrs. Divekar for starting this trend of managing difficult intubation. We shared special bond with all staff members of anesthesia dept, most of them were ladies. Whenever we used to go for conferences, my anaesthetist friends used to look after the patients postoperatively, this is almost unheard of. I still cherish their friendship.

I remember how I had to struggle in 1980s to convince orthodontists to do reverse orthodontics for decompensation cases. Here my better half came to my rescue and helped me with reverse orthodontics for decompensation. That was the beginning of surgical orthodontics in India, and me and my husband used to go and give lectures on this modality, introducing the benefits to different forums.

In September 1993, me and my husband attended 14th Australian orthodontic conference, where we put up a poster of VME case treated with combined surgical orthodontics. When we were assembling our poster in the hall , suddenly one Australian fellow came and started fighting with me, looking at our poster and told us why you Indians want to participate and grab our awards? We were shocked, but later came to know that he was winning best poster award for last 5 years and looking at our poster he was furious with the thought that he will lose it this year. We won the best overseas poster award and became famous as poster couple and

enjoyed the hospitality in different cities in Australia due to the friendship via this poster.

Prof. Bhaskar Rao had made me permanent Indian faculty for all postgraduate conventions which he used to arrange year after year

I also had opportunity to work at Maxillofacial Surgery department of Adelaide Medical College. In 1996, I worked at Cologne Medical college Maxillofacial Surgery department in Germany, with Prof. Hiddings and Director Pappe. I attended TMJoint arthroscopic workshop on cadavers, held at Bonn, Germany with Prof. Reich and gave demonstration of surgical approaches to TMJ, on cadavers to the participants. I have visited Frankfurt and Stuttgart centres as well.

Sri Lanka Association honoured me with this huge silver plaque and I am with my departmental various staff and student

Release of fifth edition of 'Textbook of Oral and Maxillofacial Surgery' at Krishna Institute Of Medical Sciences 'Deemed to be University', Karad, Maharashtra.

You are credited with being an important part of introducing affordable distractors for Indian population and thus popularising distraction osteogenesis. How did you achieve this feat?

During 1999, AFMC had organised a workshop on Distraction osteogenesis by Prof. Wangarine from Germany. After attending surgical demonstration, I was fascinated by it. I read all possible literature available. I had some friends at Bombay veterinary college. Their HOD surgery supported me and I taught them Dentistry for animals ,including scaling and root canal fillings etc. I taught them how to set fractures using osteosynthesis for horses and dogs etc. He then let me adopt six dogs through proper ethical clearance for developing and using distraction device. I had pledged that I will not sacrifice the animals for my experiment, so we developed and modified the internal indigenous distractors ,which were fitted on the dog's mandible after ostectomy. We had kept special attendant to feed the dogs and look after them for two months, their mandibles were grown and radiographs were taken .Our modified devices were working well and afterwards I again removed the neo bone ,send it for histopathological review and setback the mandible in original position by using mini plates ,simultaneously demonstrating veterinary surgeons how to fix fractured bone. This was very exciting that we did not sacrifice the animals and looked after their diet properly by

pecially cooked food. We subsequently fine-tuned our devices ,both for mandible as well as maxilla and made these devices available at Rs. 6000 each, while imported device was available for Rs. 1 lakh or so, each, and our patients could not afford them. In 2006,I received Mayor's award for helping the needy patients using these indigenous distractors.

At AFMC , Pune as advisor and honorary prof with Brigadier Anand- my teacher. Me and my husband Dr. ANIL Malik used to take lectures on surgical orthodontics for PGs

In your entire career, which was the most challenging role? What do you consider as your biggest achievement?

After retiring in 2008 from Nair Hospital Dental College, I took much deserved break for two years and then School of Dental Sciences in Karad, Maharashtra invited me and offered a post of Principal. I visited the campus and fell in love with its cleanliness, beauty and serenity. The management was very supportive and progressive, their medical college was already well reputed in Maharashtra. Unfortunately dental college had problems, which needed help. I was warned by my seniors about the difficulties but decided to accept the challenge of reviving this institute in semi urban setup, where getting good staff was also difficult.

This was the biggest challenge for me, but with God's grace and management's full support, we could clear all DCI multiple inspections through lot of methodical hard work and planning within shortest time. And I had joined there in 2010 and by 2015, we were DCI recognised UG and PG institute. We started operating on major Maxillofacial cases. By the time I retired, we had started 5 PG courses and College had state of the art equipment as per DCI norms. The institute came on the Indian map, so this difficult challenge was met successfully. Ours was the first college in India to introduce Geriatric dentistry in UG curriculum with DCI approval. I also encouraged UG students to carry out small research projects and publish papers.

Again I came back to Mumbai and started my clinical practice. In my wildest dreams also I never saw myself as holding the highest executive honourable post of a reputed health sciences university. But, miracles happen and one fine day, I saw the UGC advertisement for the post of vice chancellor of KIMSDU, Karad. Again my inner voice told me that there is no harm in applying for it. I had put all my certificates literally in the attic, thinking I will not need them anymore. I had to dig them all

,sort them all. I had difficult time collecting all documents under different headings, but I could eventually do it and to my amazement I was fulfilling most of the requirements for the post.

The moral of the story is that we casually do so many things and forget about it. But if you have chronologically keep the documents for even smallest things, it can come handy in future. Luck would have it that all my awards and certificates I had just dumped in one bag, without sorting them. So my advice to you all that collect all the evidences of your good work and store it digitally in different folders, making different categories.

Later on I came to know that all other applicants were from medical stream and I was the only one from dentistry stream. OMFS is often referred to as the bridge between medicine and dentistry, and I feel it is because of my speciality, I was chosen for this most coveted illustrious position.

26th January Flag hoisting ceremony

16-06-2016, was the most glorious day in my life as I was appointed officially as Hon'ble Vice chancellor Of prestigious Krishna Institute of Medical Sciences Deemed to be University. Again with God's grace, I received the honour of becoming First Lady Vice Chancellor in India, of the health sciences university, from dental fraternity and also from Oral and Maxillofacial surgery specialty, I always dedicated this honour to my fraternity as well as to all Maxillofacial surgeons all over India.

During my tenure as Lady vice chancellor, I initiated many women centric programs at university level, which was whole heartedly supported and encouraged by Our Hon'ble Chairman and now Hon'ble Chancellor Dr. Suresh Bhosale, who himself is a dedicated breast cancer surgeon. Working under his visionary patronage I had wonderful, fruitful time and we added many milestones in the history of our reputed university.

Establishment of Prof. Herman Sailer Chair in facial cleft & Craniofacial Surgery at KIMSDU, Karad.

What are the prominent changes you see in OMFS today compared to past?

I have witnessed the nomenclature and scope of oral surgery expanding as oral and Maxillofacial surgery, craniomaxillofacial surgery over these years. Our times very few women entered the field, but now I am happy to see that in every state, there are so many women doing excellent surgeries and they are equally eager to impart the knowledge.

Kudos to women power, but also salutations to the men supporting them and accepting / recognising their skill and capabilities.

Earlier cleft lip and palate surgery, esthetic facial surgery, reconstructive facial surgery, hair transplant, soft tissue corrections etc were handled by plastic surgeons. Then slowly Maxillofacial surgeons were accepted as a team member, while carrying out such procedures. The access osteotomies were always done by us as an important team member in tumour surgery. With the advent of Orthognathic Surgery, and distraction osteogenesis, plastic surgeons recognised Maxillofacial surgeon's skills and training. Some Maxillofacial surgeons started handling / managing oral malignancies as well as reconstruction.

Now the boundaries are becoming more and more blurred. With proper training and using new technologies and materials, now the different procedures are carried out by Maxillofacial surgeons with great finesse. DCI has also officially increased the scope. With the global connect and Google, our youngsters are getting to witness knowledge explosions. They are lucky to get mentors from any part of the world, which was not possible earlier at our times. Now I feel that sky is the limit now.

Completion of fruitful tenure as vice chancellor at KIMSDU.

What are some changes you would like to see in our specialty in the upcoming years?

As far as AOMSI is concerned, it has become more vibrant. Even during pandemic the educational programs were chalked out .Students and faculties were benefitted by lectures, video demonstrations given by renowned, committed, efficient national and international faculties .This has helped to simultaneously coming together for the cause and developing friendships and bonding. This is important for the growth of our speciality. Now the students can approach many /any role models for motivation and guidance.

AOMSI have announced Foundation. I hope that it's activities increase multifold to benefit the members,as International association is celebrating its foundation silver jubilee. Long Live AOMSI !

With Hon'ble Governor of Maharashtra Shri VidyaSagar Rao

Please share a message for young women maxfacs.

Oral and maxillofacial surgeons per se have a challenging task of establishing their finesse and prowess in handling surgeries and emergencies; this may sometimes be daunting to women in the field, to juggle home and profession. Enjoy the vocation and its challenges with complete heart and soul.

I sincerely believe that if you choose a job you love, you will never have to work a day in your life. Short cut approach may suffice for short term goals

such as passing exams, but if one has to rise above the mediocre and aim towards achieving excellence then through and in-depth knowledge would have no substitute. Every rung of the ladder to success has to be climbed in order to reach the top and stay at the top!

It is not that all my life was a cake walk.I faced many problems as a girl, woman, but I was determined to overcome all and focused on finding solutions rather than cribbing. At this stage I feel blessed and privileged and I thank profusely from bottom of my heart to the different men in my life at different stages, right from my grandfather, my father, my husband, my father in law, mentors, teachers and well wishers. Without their support and encouragement, I would not have been what I am today .

My hats off to all women of substance in our profession ,Who have endured, conquered and evolved as a strong person in the society. I very much believe in retaining our femininity and inner beauty, we do not have to compete with men ,but create our own identity as per the best of our ability. Love, Compassion, Dignity, Strength, Empathy, Elegance, kindness, composure, courage, confidence, humble attitude, gratitude, innovative and honest mind, and intelligence will lead you definitely towards rewarding self empowerment. Embrace your individuality and be happy the way you are.

“

Always remember that the best surgeons not only exhibit extraordinary technical skills, but much more. They value their mentors, who provide exceptional knowledge of medicine, diseases, and human relationships. They are humble and endowed with the ability to create and nurture a team with empathy and sharing in human suffering, with dedication, and ultimately with love, for patients, for family, for friends, and for humanity at large.

”

I would like to end my heart to heart prologue with each one of you with a big thank you and much love and affection.

I would like to pray to God almighty for mankind's safety and happiness.

8th Maharashtra chapter of ADMSI, Ahmednagar

Pre-conference courses

Date: 7th April 2022.

1. Hands-on workshop on minor oral surgery, learn from the experts | Registration fees- Rs 2000/-

Faculties: Dr. Vijaykumar Girhe, Dr. Kiran Gadre, Dr. Vikas Meshram, Dr. Rajesh Sabnis, Dr. Sachin Bagade, Dr. Anuj Jain, Dr. Jayant Landage

In this course the participants were taught basics of minor oral surgery on goat jaws. A basic minor surgical kit was given complimentary to all the participants

2. Role of PSI in Maxillofacial reconstruction | Registration fees- Rs 2000/-

Faculties: Dr. Abdul Hameed, Dr. Satyajit Wadje, Mr. Pranav Sapkal

This course included lectures and demonstration of the software

3. Cadaveric flaps demonstration | Registration fees- Rs 2000/-

Faculties : Dr. Vijay Deshmukh, Dr. Vinayak More, Dr. Ankush Bhandari, Dr. Prashant Chopda, Dr. Khuzema Fatehi, Dr. Kailas Gawai, Dr. Deepak Singh

In this course lectures and demonstration of regional and free flaps on cadavers were done

4. Hair transplantaion | Registration fees- Rs 2000/-

Faculties: Dr. Arun Panda, Dr. Rahul Bagrecha, Dr. Pawan Dawane, Madhura Kulkarni

This course included lectures and live demonstration of hair transplantaion on a patient

5. Advance implantology | Registration fees- Rs 2000/-

Faculties: Dr. Pushkar Gadre, Dr. Anuj Dadhich, Dr. Vipin Dehane

This course included lectures and hands-on demonstration on models

6. Management of medical emergencies and Basic Life Support | Registration fees- Rs 1000

Faculties: Dr. Seemit Shah, Dr. SachinDahiwalkar, Dr. Pravin Mukhi, Dr .Amol Doiphode, Dr. Govind Mantri, Dr. Govind Changule

This course included lectures and demonstrations of CPR on mannequins

Seminars conducted: **14**

2
DAYS

17 - 18th March
2022

Media coverage: **AVS NEWS CHANNEL**

Students were also given the chance to witness and assist live surgeries performed by well known Oral & Maxillofacial surgeon of the country, Dr. Krushna Bhat, Assistant Professor, AIIMS Delhi on 17th March. Along with academics, various fun activities were also conducted to make the program more eventful and memorable for everyone attending it.

AOMSI KERALA

In association with
Kerala Society of Ophthalmic Surgeons
OCULOS 2022 - Symposium on
Orbital Trauma

Core organizing team

Dr. K Mahadevan Dr. Yeshaswini Thelakkat
Dr. Bindu Thampi Dr. Remya .R

Date: 24th April, 2022

Time: 09.00 am to 03.00 pm

Venue: Sree Gokulam Medical college &
Research Foundation

Moderator: Dr. Oommen Aju Jacob, Dr. Mahadevan

Chief Guest: Dr. Chandra Mohan
(Dean , Sree Gokulam)

Number of participants : 97
Number of faculty : 7
Number of Lectures conducted : 7

Hearty Congratulations to

Dr. Manik Saha

Oral & Maxillofacial Surgeon
has become "Chief Minister of Tripura"
Hearty Congratulations & Best Wishes to Dr. Manik Saha for future endeavours.

Dr. Gunaseelan Rajan

on taking over as the
President of the Asian Association
of Oral and Maxillofacial Surgeons at Seoul.

AOMSI

MASTER CLASS 2022

A Grand Success!!

1 Total Number of Hall	6 Total Number of Days	11 Total Number of Sessions
11 Total Number of Chat Coordinators	22 Total Number of Moderators	36+ Total Number of Hours
44 Total Number of Panelists	67 Total Number of Speakers	902 Total Number of Registrations

Date: 4th, 5th, 6th, 11th, 12th, & 13th March 2022

Knowledge Shared & Exchanged **Unlimited**

Mode of conduct : Online

Organising team:

Chairman: Dr. S. Jimson

4 Zonal Coordinators: North: Dr. Sanjeev Saxena, South: Dr. Anil Desai, East: Dr. Rajarshi Banerji, West: Dr. Ramakrishna Shenoi

Session Coordinators: Dr. Manish Raghani, Dr. Ashi Chug, Dr. Sankarsan Choudhury, Dr. Yeshaswini, Dr. Arjun Krishnadass, Dr. Sonal, Dr. Amit Dhawan, Dr. Manikandhan, Dr. Abhilasha Yadac

Date: March 4, 5, 6 and 11, 12 & 13, 2022. (6 days)

Total sessions: 11

- » Every session was structured to include short lectures that touched important topics and panel discussions that discussed the clinical application of the knowledge.

No. of participants: 902

No. of speakers: 67

No. of panelists: 44 panelists

Special feature: **Viva sessions:**

- » The Masterclass weekends were followed by the AOMSI grand viva over the next two weeks.
- » The viva sessions simulated the actual exam viva where each student was evaluated by two different examiners for a total of 40 minutes and all topics were covered.
- » About 500 students came forward to have a feel of Viva.

Ask Your Mentor

Season

3

Conducted by: ADMSI (Tamilnadu and Puducherry branch)

Organising team:

President:

Dr. V B Krishnakumar Raja

Honorary State Secretary:

Dr. Jimson Samson

Faculty Co-ordinators:

Dr. Elavenil Panneerselvam, Dr. Sasikala Balasubramaniam and Dr. Kalpa Pandya

Program highlights

- This unique program features discussion of topics put forth by the trainees
- The program offers a personalized interface for students to seek clarification on queries from renowned faculty from all over the country.
- Questions from the trainees were collected through Google forms and presented to the mentors for deliberation.

Participants: 200-250 students across India through Zoom and YouTube.

No. of sessions: 11 sessions covering a wide range of exam-oriented topics in Oral and Maxillofacial Surgery.

- Each session comprised of two topics and involved two Mentors (1 for each topic) and a Moderator.
- The sessions evoked great interaction and enthusiastic participation from students and excellent teaching by the Faculty.

The AOMSI fellowship program aims to train young OMFS who acquire adequate knowledge at the end of their residency but would need more Hands-on opportunities and skills to independently manage a variety of cases in different sub-specialties of Maxillofacial surgery.

The first AOMSI fellowship exam was conducted in Vijaywada, during midterm convention in 2015, for Trauma and Orthognathic surgery fellowships. AOMSI, currently offers fellowship in 3 sub-specialties - **Maxillofacial trauma, Orthognathic Surgery and Oral Oncology.**

The trainees are shortlisted after qualifying a national level examination. The selected trainees undergo an interview. The AOMSI fellows are paid an educational grant/ stipend during the course of their fellowship. The duration of the training is for a period of one year.

The following section in Max-Facts is dedicated to highlight about the features of the fellowship centres of AOMSI. Every month two centres will be featured along with an interview of a fellow who has had a first hand experience of working at the centre.

For more information regarding the AOMSI fellowship, log on to - www.aomsi.com

AOMSI - CRANIOFACIAL TRAUMA FELLOWSHIP CENTRE

Max Super Speciality Hospital, Patparganj, New Delhi

Course director:
Dr. Rohit Chandra

Other faculty in the department:

Dr. Manoj Johar, Dr. Pradeep Singh &
Dr. Abid Saleem (All Plastic Surgeons)

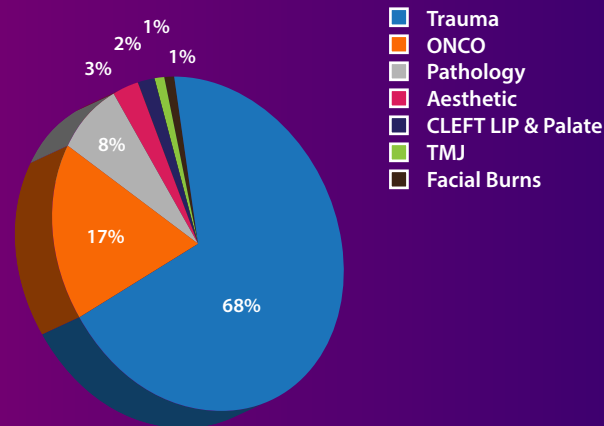

**Year of commencement
of AOMSI fellowship** : 2017

**Number of AOMSI
fellowship seats per year** : One (via AOMSI
Fellowship Exam)

Procedures done at the center :

2017 200	Total dept cases 800 + (Plastic)
2018 248	Total dept cases 850 + (Plastic)
2019 283	Total dept cases 900 + (Plastic)
2020 137	Total dept cases 600 + (plastic)
2021 263	Total dept cases 850 + (Plastic)

Publication/Presentation by the AOMSI Fellows:

Paper presentation in 44th Annual conference of AOMSI, Bengaluru by Dr. Kamini Dadsena (Fellow 2019)

Title - Treatment outcome of Transparotid approach with ORIF for condylar fractures: -
A Retrospective clinical and radiological follow-up

Paper presentation in 45th Annual Conference of AOMSI, Mangalore by Dr. Chandni Mathur (Fellow 2021)

Title - Transconjunctival approach for management of Orbital and Infraorbital rim fractures

What makes this centre special ?

Diversity of trauma cases | Extensive exposure to soft tissue injuries of Head and neck region | Free flap reconstructions for Oncosurgical cases and Extensive traumatic soft tissue defects | Routine Microvascular anastomosis under microscope, Facial Esthetic surgeries done under magnification | A disciplined working environment | Weekly academic meet | Lots of hands-on under expert supervision | Being a part of a Plastic Unit | extensive exposure to Plastic Surgery Procedures, Active participation of the Fellow in the preparation | planning, documentation | surgery | post-operative care and followups of the cases | Exposure to medical optimization of sick patients requiring surgical intervention

AOMSI FELLOW PERSPECTIVE

Name of the fellow: Dr Kamini Dadsena

Year of joining fellowship program: Nov 2018 to Dec 2019

Working now at Senior Resident in All India Institute of Medical Sciences(AIIMS), Raipur, Chhattisgarh (India).

Describe in one word your time at the fellowship centre ?

"Transformation of Life"

Your learning experience at the centre ?

Getting the opportunity as a Craniomaxillofacial trauma fellow in Max Super Speciality Hospital was really an extensive experience. A disciplined working environment, the abundance of clinical materials, sophisticated instruments, excellent infrastructure and guidance of highly qualified doctors have given me lot of confidence.

Briefly describe a typical day at the fellowship centre ?

My day starts with ward rounds by myself with dressing before consultant rounds. After that, rounds with consultant and case discussion of both preop and post-op cases. Post ward rounds, we have our daily OPD and follow up reviews and minor procedures under LA and evening ward rounds before leaving hospital were the daily routine. We have our OT(s) and 24X7 Emergency calls in between. Also, we have weekly academic meet with seminars, Journal clubs and clinical discussion.

Any particular anecdote which you would like to share with us ?

Our department consisted of 10 doctors, including consultants and fellows and three-four supporting staff. People in the department used to be very busy with their work since morning, but we had lunch together. We always used to wait for lunch for each other. I would share my personal experience here. Every fellow and associate consultant has Emergency on-call duty at least twice a week.

One day during lunch, I told everyone I would go early and sleep nicely since I was exhausted. Immediately my mentor, Dr. Rohit Chandra sir, told me, "Kamini, you keep my words, definitely, there will be calls for emergency cases tonight".

And, you people won't believe, the whole night I was attending emergency calls. My mentor Dr Rohit, himself used to say, "I can anticipate what will happen in the near future." We all started believing that he has Kaali Zubaan (Black Tongue). Hence started the legend of the Black tongue in our Department.

What did you learn beyond OMFS ?

Since I was working in the plastic surgery department, I also got the opportunity to learn from expert plastic surgeons. Apart from OMFS I learn how to do initial management of limb injuries. This fellowship also improved my communication skill, patient care and how to work proactively in a disciplined way.

How did the fellowship program help you ?

- Noble clinical skills.
- Confidence in dealing with complicated surgeries/procedures.
- Connection/interaction with the experts working across the world in the field of OMFS.

dr.kamini13@gmail.com

AOMSI - ORAL ONCOLOGY FELLOWSHIP CENTRE

Nangal Cancer Hospital and Research Institute, Bikaner

Course director:

Dr. Jitendra Nangal

Other faculty in the department:

Dr. Vaibhav Sachdeva (MDS, OMFS)

Dr. Suman Singh (MD, Anaesthesia)

Year of commencement

of AOMSI fellowship : January, 2022

Number of AOMSI

fellowship seats per year : 2 (presently 1)

Procedures done at the center :

Minor and Major surgeries are done. Yearly on average 400 cases are operated on, of which head and neck comprises approx.

50% of the cases.

- 1. Screening in Oncology
- 2. Head & Neck oncology
- 3. Breast oncology
- 4. Esophagus and thoracic oncology
- 5. Gastro-intestinal oncology
- 6. Uro and Gynaec oncology
- 7. Bone and soft tissue oncology
- 8. Day care chemotherapy
- 9. Pain and palliative care clinic

In head and Neck oncology:

- 1. Biopsy
- 2. Laryngoscopy and endoscopic procedures
- 3. Other minor surgical procedures
- 4. Oral, oropharyngeal and laryngeal carcinomas
- 5. Peri-operative planning including chemotherapy and radiation therapy

Publication/Presentation by the AOMSI Fellows: Ongoing

What makes this centre special ?

Provides comprehensive treatment for patients. This is a high flow center with focus on all aspects of management. Presents a comfortable work space to make sure the fellows learn procedures in a planned step by step manner.

Name of the fellow: Dr. Uthra K S
Year of joining fellowship program : January, 2022
Working now at: Ongoing fellowship

Describe in one word your time at the fellowship centre?

Fruitful.

drksuthra@gmail.com

Your learning experience at the centre?

The experience so far has been good. There is a systematic approach to learning and equips to learn from the basics.

Briefly describe a typical day at the fellowship centre?

My day starts with morning rounds, dressings of patients, OPDs, planned surgical cases, postoperative care and evening rounds. Some days would also have minor surgical cases and case discussions.

Any particular anecdote which you would like to share with us?

NA

What did you learn beyond OMFS?

Every work here at the center has helped me see beyond OMFS, to see the patient as a whole, including insights into planning and medical management.

How did the fellowship program help you?

Ongoing

Your advice to the young OMF surgeons?

Every exposure or experience with different centers and surgeons counts.

Dr. Uthra K S operating in the OR

Centre of excellence

Name of the centre: Synergy Institute of Cancer Care and Research, Gorakhpur

Name of the surgeon & designation at the metioned centre:

Dr. Gourav Popli,
Associate Consultant,
Department of Surgical Oncology -
Synergy Institute of Cancer Care

Dr. Alok Tiwari,
HOD of department of Surgical Oncology and
Director- Synergy Institute of
Cancer Care and Research

Working at this hospital / clinic since : July 2021 (Institute came into inception in July 2021 only)

Number of cases performed per year :

- a) Approx 60 major Head and Neck Cancer Surgeries in last 6 months
- b) Approx 70 minor Head and Neck Surgeries in last 6 month

Proportion of various Procedures performed:

- Composite Resection-
- a) Approx 40 in last 6 months

b) Glossectomies

c) Neck Dissections

d) Free flaps

e) Locoregional flaps (PMMC, Nasolabial, Temporalis)

f) Thyroidectomies

g) Tracheostomy

h) Maxillofacial Trauma

i) Laryngoscopy and Biopsies

j) Minor Oral Surgical Procedures

- Approx 20 in last 6 months

- Approx 80 in last 6 months

- Approx 15 in last 6 months

- Approx 50 in last 6 months

- Approx 15 in last 6 months

- Approx 40 in last 6 months

- Approx 15 in last 6 months

- Approx 80 in last 6 months

- Approx 15 in last 6 months

Affiliations to any programs/ universities:
Tertiary referral center of Cancer India Clinics (Cancer India Clinics have its Oncology based OPDs in 8 centers in Purvanchal region as of now)

Is your centre open to invite candidates for observer-ship/ training / fellowship ?

Only for Observership

Duration of training ?

2 months

Is it a paid training?

No. We have a registration fees - 5000 INR

Number of fellows intake per year ?

Observer position is available at a time (Maximum 6 observers in a year)

How to apply for observership/ fellowship

We can be contacted at 7234006595/7234006597 or
at drgp0250@gmail.com/ialoktiwari@gmail.com

Are there opportunities for research at your centre ?

- Yes- We have a) Institutional Ethical Committee
- 2) Various ongoing pilot research projects
- 3) Onboard Women Research Scientist as faculty (Department of Health Research- ICMR)
- d) Weekly Multidisciplinary tumor board meetings
- e) Weekly Seminar/ Journal clubs

Is there any facility for trainee accommodation ?

No. We will assist in finding a suitable accomodation near institute premises.

What makes your centre unique ?

We are the comprehensive cancer care team catering a huge population of Purvanchal, Bihar and Nepal. Within last 8 months of Inception, we are doing maximum number of Onco surgeries in Gorakhpur and associated districts.

Centre of excellence

**Do you want to be featured
as a centre of excellence ?**

**A shout out to all OMF surgeons
to get featured on Max-Facts!!**

- Are you working at a high volume centre ?
- Are you willing to train young OMF candidates ?
- Is your centre open to inviting candidates
for observership or fellowship?
- Are there opportunities for research at your centre ?

If it's a "YES" write to us at "maxfacts@aomsi.com" &
we will feature your centre of excellence
in our upcoming issues!

Let's join hands to learn better and grow together!

A portrait of Dr. George Paul, a middle-aged man with a grey beard and glasses, wearing a red shirt. He is looking down and to the side with a thoughtful expression. The background is a soft-focus green foliage.

Spotlight

Interview

Dr. George Paul

Prof. Dr. George Paul, is an eminent Oral and Maxillofacial Surgeon practising in Salem, Tamil Nadu. Apart from mastering the nuances of various surgical procedures, he has, to his credit, a formal degree (LLB), followed by a PG Diploma in Medical Law and Ethics, and is known as one of the authorities on the subject of medicolegal intricacies among doctors. Apart from being a full time consultant and Hon. Medical Director of Sharon Cancer Centre, he was also the Former Hon. Gen. Secretary and Past President of AOMSI. Dr. George Paul, has played a phenomenal role in spreading awareness by means of various lectures and seminars on medico-legal aspects affecting OMFS and guided doctor's needing advice in medico-legal matters. He has also authored a chapter on the medico-legal aspects in OMFS in the AOMSI textbook. In this issue of Max-Facts, we throw the spotlight on his journey from dentistry to OMFS to Legal matters.

Questions?

Tell us about your growing up years.. ?

In the literal sense, I never grew much and remained the smallest and youngest kid in every school class. My father, being a successful dentist, provided me with a relatively privileged childhood in an upscale boarding school. But there was a catch. From my early years it was dinned into me that I should become a dentist. I had no inclination to become a medical professional of any kind. My academic achievements at school were mediocre on account of a combination of indifference and laziness which would have been diagnosed today as ADHD. In any case, I could not secure a government seat for MBBS or BDS and I was even secretly happy about it. My father was one step ahead and he got me admitted into the only private dental college those days. I joined dentistry at CODS, Manipal in 1977. So unlike most people BDS was not a second choice.

What was your graduation time like? What made you choose OMFS as your specialty?

Although I joined CODS, I took a transfer to the Dental Wing of the Government Medical College in Trivandrum (it was not designated as a dental college those days). I was still

indifferent to medical studies in general and dentistry in particular. But those were the best years. I excelled in everything except academics, barely scraping through without ever failing.

I did not specifically choose OMFS. I applied for the first PG entrance test in 1983 . It was a level playing field because it was announced at short notice. To the surprise of everybody, including me, I got a high rank and got into OMFS. Despite my general apathy to dentistry, I somehow took a shine to surgery. I was committed enough to accept it as a vocation.

With Dr. Sanjiv Nair

What was your PG routine like?

I was much more serious about my career during PG. My only batchmate was from the government service, much older than me and married with two children. So I stood in for her for all night calls. That gave me some exposure in the Emergency Room. Trivandrum was a hub for medical services to southern TN and Kerala. I certainly benefited from the exposure Ina busy Government Medical College. We had outside postings only in Plastic and Anaesthesia those days. Those departments allowed us to do a significant amount of work including suturing

Questions?

and emergency. I could intubate and catheterise patients but the repertoire of core OMFS was limited. There were no plates and screws or dental implants. I was lucky to see one or two orthognathic surgeries. But like all fresh graduates, I came out starry eyed with fingers itching to operate. I decided very early that I was going to practice only OMFS. This was a disappointment to my father. Fortunately my wife, a general dentist, inherited my father's practice and fulfilled his dream. She makes more money than me today, but I have no regrets. If you want to make money, OMFS is not the best speciality.

With wife in 1991

Please share with us an anecdote from your Post graduate days that has been a learning lesson for you.

Too many anecdotes really. I was a bit of a revolutionary and certainly not a submissive student. I had an unkempt beard those days. My boss asked me to shave and I refused. Not that I had any style or sentiment about beards. It was an assertion. I still carry that assertive

attitude but I don't hesitate to apologise if I am wrong. Fortunately, my boss did not hold it against me and I appeared for the final practical examination with a beard.....and passed. I still keep a smaller vestige as a token of that act of defiance. The lesson I learnt is to not allow anybody to unreasonably trample over your rights. This is particularly important for women.

A day before final year PG exam, in the hostel room
(year:1986)

Tell us your most memorable OT experience

In a career spanning 36 years, it would be difficult to name a single event. I have had my share of anxieties and danger of complications and undesirable outcomes. I also had the highs of making a difference on patients by doing procedures that were life changing. I trained and went into Head and neck oncology in 1994-5. This exposed me to intense procedures long before most of my colleagues did. It had nothing to do with ability or skill. I was at the right place at the right time. It was a time when surgeons were

Questions?

worshipped. I got away with bad outcomes including death. But it also taught me to face surgical adversity with equanimity. It is a defining mental skill that every surgeon must have. I have saved lives with emergency procedures like tracheostomy and taking carotid control. These skills, in my opinion, are fundamental and every OMFS should be trained in it.

My most adrenaline pumping experiences are related to how I have deployed them and having the satisfaction of receiving the approbation of the other specialists in an operating room. Most dramas happen around securing airways and controlling bleeding and I have had my share of them.

Who has been the biggest influence in shaping your career

I cannot name one person. Several friends, colleagues and even students contributed in shaping my career. I have to mention that I had the good fortune to be in the right place at the right time in my early years. Settling in a tier 2 city with no plastic surgeons, oncologists or OMFS gave me an enormous opportunity to start operating at a young age with the sure knowledge that I couldn't turn to anybody for help. I made my share of mistakes but never allowed it to unsettle me. The confidence and brashness of youth was slowly replaced by the caution and maturity developed through experience. There are several people who have taught me skills and I have no hesitation in calling my former students or young surgeons for suggestions. I don't want to take the names of my benefactors lest I leave out someone. They have all been influencers.

With friends and colleagues at IAOMS conference in Vienna

Questions?

How did your involvement in AOMSI begin? What drew you towards the workings of the association?

I became an executive member in 1999 when floor elections were the norm and few people were interested. The second time, there were not enough nominations for EC. I got automatically elected. Thereafter I became the VP in Goa standing against a prominent person. I surprised myself by winning hands down. In 2003, I was elected again as national secretary. In 2008 I was unanimously elected President Elect in a raucous AGM that I would rather forget. Politics had begun with outside forces interfering in AOMSI. I never really had ambitions in AOMSI. However, once I was on the ladder, I climbed; rather successfully. I am happy that I could contribute to some major policy decisions in the AOMSI. I deem it an honour and privilege to have been associated with this great speciality association.

How did 'Law' happen? Was it an interesting subject for you always or did some incident draw your interest towards it?

As mentioned earlier, I wasn't particularly interested in medical science and my leanings

were towards humanities, which included law. I enrolled in an evening college in the early 1990s. I wrote a few first year papers but then got busy. But I finished the course. In 2002, I got a letter from the law College informing me that they were going to close down the 3 year course (after graduation) and switch to an integrated 5 year programme. I had two attempts to write 12 or 13 papers. I prepared briefly and wrote all the papers in one shot thereby getting a law degree (LLB), albeit with modest marks. I later did a diploma in medical law later from the National Law School of India University and even wrote a book on medical law. I have an abiding interest in the complexities of law and ethics. I still believe that I would have made a better lawyer than a surgeon. But I am not complaining. I have made a reasonably good career as an OMFS with practice restricted to my speciality. It's my bread and butter.

With professional indemnity being a buzz word these days, can you throw some light on what are the key considerations while choosing an indemnity policy?

One should calculate risks based on the nature of work. If one does cosmetic

Questions?

procedures or procedures that can invite large claims they should choose premium schemes that cover larger payouts.

Generally, indemnifying oneself for small amounts is not very useful. If sued for damages, most of us can afford 1 or 2 lacs. So indemnity should cover payouts for larger claims that would pinch the surgeon's purse.

What sets the AOMSI Professional Indemnity apart from the other schemes available in the market?

The indemnity scheme rolled out by the AOMSI fulfills the special needs of OMFS and I think the premiums offered are very reasonable compared to what is offered directly through Insurance companies. OMFS needs larger indemnity than other dental specialists and we don't fall into the loop of IMA's scheme. This one is tailor made for OMFS.

The AOMSI scheme offers some extra benefits

obtained by clever collective bargaining by those who negotiated the plans. Great work!

What is the one advice you would give all your fellow OMFS to help them be medicolegally safe ?

The single biggest issue is medical negligence. I have noticed that most people don't understand the nuances of negligence. Most litigations originate from dissatisfaction or unreasonable expectations from patients. So, communication with your patient and being realistic goes a long way in preventing unnecessary medico legal tangles. An inscrutable and comprehensive Informed consent covering all bases is important in preventing litigation.

With family in traditional attire

Questions?

Quick Five

What do you find more interesting: law or surgery?

Surgery is my wedded wife. Law is my lady in love.

What is your motto in life ?

It's one small life. Live it to its hilt.

If you could change one thing/ quality/ habit in yourself, what would it be

My short temper.

Biggest strength and weakness

My strength and weakness is an inability to say 'no'

What is your biggest regret in life ?

No regrets.

Favorite Five

Favorite surgery / procedure ?

a comprehensive neck dissection. I hate hardware and instrumentation. All you need is a knife, scissors, a bowie and some good anatomy in your head. A fearless attitude helps.

Favourite quote / author / book

I am a compulsive and prolific reader. The question is too tough. In the context of medicine there are a few great writers of Indian origin. Atul Gawande, Abraham Varghese, Sidharth Mukherjee . Fiction- John Steinbeck, Jumpa Lahiri, Gabriel Garcia Marquez , Ernst Hemingway etc etc. Non Fiction- Yuval Noah Harari, Bill Bryson, Paul Theroux etc etc.

Favourite place

I have travelled extensively. However, Home is my favourite place.

Favourite celebrity / role model

none specifically

Favourite AOMSI conference

Coimbatore 2010 (Only because I was the organising chairman and the national president). All conferences are heartwarming events. I have missed only 2 in 30 years.

BEYOND OMFS

Dr. Praveen Ganesh

Dr. Praveen Ganesh is an Assistant Professor in the Saveetha Craniofacial Unit, Department of Plastic, Reconstructive & Craniofacial Surgery, Saveetha Medical College & Hospital, Kancheepuram Dist. Working as the Project Director of Smile Train at his center, one cannot help but wonder what about his aura sets his apart from being just another OMFS? Well, for one, he can take an aim at someone at the speed of lightening. For those of you who are not aware, Dr. Praveen is a highly trained professional in the field of not just OMFS, but also Mixed Martial arts and Boxing. In this section he talks to us about his training Beyond OMFS, his journey and how training in MMA and Boxing him helped in becoming a better surgeon.

Questions?

Boxing and Surgery are not one of the most common companions, please tell us when and how was the seed for interest in boxing and Mixed Martial Arts sown?

My first exposure to Boxing and MMA (Mixed Martial Arts) was in school. I was fascinated by the way the fighters moved surely, fearlessly with absolute ease. Their quick cat-like reflexes intrigued me and I got myself enrolled in a boxing class.

Please share us a bit about your professional training in this field?

There are 3 levels of training in Mixed Martial arts. The ability to execute any physical activity with a certain level of efficiency. The ability to execute that specific physical activity with greater ease and effortlessness. The final penultimate level of training is building and optimizing neuromuscular and kinetic chains that can last a lifetime. I did my Military schooling where Taekwondo was an integral part of the curriculum. As an Army Kid I had many opportunities to train Taekwondo with the best in the field which helped me get a Black Belt.

There are many good training centers across India. In Bangalore I used to train at the Fitness Fight Club. At present I train with Chennai MMA

academy. I have been training with them for the past 5 years. Consistency is the key to mastering any art, so it is prudent for me to say that everyday practice is a must to keep up the form.

As an OMF surgeon, I believe in training for a lifetime. Constant learning to evolve from a level of conscious competence to unconscious competence.

Is there any special training process that you undergo before competitions?

There is definitely a special training for the fighters. When you want to train to fight, you will first need to build your mental capacity. One has to acquire deepest level of self confidence and highest form of physical endurance to be able to participate.

We generally tend to have a separate fighter training session where the focus is more on building a stronger spirit. The old adage "sweat more in training, bleed less in battle" makes perfect sense in this regard. In the end you can only fight the way you practice.

Questions?

Apart from this the other aspects include Proper Nutrition, Hydration, Prevention of Injury and enhancing faster Recovery.

Amidst your hectic schedule how do you take out time for staying regular? Any tips for time management for out fitness enthusiasts who are not able to squeeze in fitness in their schedule?

This is the most difficult part being in our profession. However Time management is the key. I personally manage to spend at least 4 hours in a week. Plus once you know the basic one doesn't need to go the academy to train every time. Just spending as less as 10 minutes at home should be enough. It doesn't need any equipment per se to practice the fundamentals. This is as important as squeezing in time for having food or a party. There is always time or one should make time for it.

Please share with us a memorable anecdote from the boxing ring.

There is a famous saying in boxing, which is "Everyone has a plan until he gets punched in the face". During my last fight, I had sketched an excellent strategy, studied my opponent's moves thoroughly. All of that became null & void after that first hit on my face. I lost my confidence, lost my guard, kept on getting punched. My coach came up to me and told me that I should believe in my training, work on my strengths and keep calm. Most importantly stick to my basics. With this, I regained control in the ring and eventually won.

I can relate succinctly to the day when I was a trainee and did my first retromandibular approach for a condylar fracture. I had accidentally nicked a vein and it started bleeding profusely. I panicked and lost all my planes. Suddenly I remembered that all I needed to do was to stay calm, control the bleeder and

proceed.

Whether it is boxing or surgery, a strong foundation in basics is the cornerstone for success.

Can you give some examples to us as to how MMA/ Boxing has helped you in your OMFS practice?

During the initial days of boxing, I was fearless and cocky, until I tasted my first knockout. That forced me to admit that I was actually at the mercy of anyone stronger, more nimble or more practiced than myself. There was no way out, but "ceaseless practice" and "endless repetition". I could relate this to the beginning of my OMFS career, where I was so confident of taking up surgeries. Later it dawned upon me that complications can happen and only by relentless training, perfection can be achieved.

One of the key components of MMA training is "Shadow Boxing". We are taught to visualize ourselves succeeding with the fight. It's a way of ironing out minute movements and highly technical skills acquired through training and instruction. It gives us an idea of what is, what is not, and what needs to be fixed. I had just completed my residency in OMFS, my boss was out of the station and I get a call from the Neurosurgery department about a complex case of meningoencephalocoele posted for joint surgical intervention. I was excited but nervous. I started shadow boxing the entire

Questions?

surgical procedure in my mind, step by step. By visualizing the possibilities repeatedly, I reduced my fear to their proper proportions. Eventually, the surgery turned out to be far less difficult than I had originally feared.

Boxing and MMA have made me fit as an athlete. It's a sport that involves the mind and body in coordination, similar to us handling a scalpel. Fitness I feel is very important to us as surgeons as it has always helped me stay mentally alert and physically enduring during long hours of the procedure.

//

The actual process of fighting is highly mental as much as it is physical & so is Surgery.

What is the most important life lesson boxing taught you?

Life inside a boxing ring has taught me many things. To me, it is a miniature cosmos where I face my fears, anxieties, and habits. It is a place where I have learned a great deal in a short time about who I am and how I react in this world. After years of training, I came to realize that the deepest purpose of any Martial art is to serve as a vehicle for attaining ultimate awareness.

I have felt the same whenever I entered an operating theater as a surgeon. The essence of being a fighter and a surgeon is surprisingly

similar. Lessons I learned as a Boxer has inspired me in many angles to be an OMF surgeon. It's a parallel world, which often overlaps, and interchange.

What are your future goals with your training in MMA / boxing?

The highest form of martial arts is when you transcend the art into an artless art. Today boxing and Mixed Martial Arts have become an aspect of my life that helps me evolve into a better surgeon, a better human, as any form of art should, by externalizing our best internal qualities.

What message will you like to give to your fellow OMFS who are interested in learning MMA/boxing?

A fit body, a calm mind, to develop a competence that ultimately works; these are the things which money can't buy, one has to earn it. In this digital world taking up MMA or Boxing is an easy way to keep us grounded in reality. A better health and a better future is your responsibility

AOMSI PROFESSIONAL INDEMNITY SCHEME (PIS)

What is Professional Indemnity?

Professional Indemnity insurance covers legal costs and expenses incurred in your defence, as well as any damages or costs that may be awarded, if you are alleged/convicted to have provided inadequate services to your patient. (Negligence or wrong treatments or accidents)

Why you need Professional Indemnity??

We fall in the ambit of the CPA Act as per the Hon. Supreme court verdict 1995 and hence liable to be penalised in court of law for negligence if any. The recent amended Consumer Protection Act CPA 2019 has brought in lot of changes in the favour of the consumers. E-Filing of complaints have been introduced enabling any patient to file a case against you sitting at home without any advocate or much legal fees. The Compensation awarding limits of the courts have been significantly increased. The lowest forum of the consumer court ie District Commission: **Upto 1 cr**, State Commission: **1cr – 10cr**, National Commission: **> 10 cr**. To top it all, the patient can now file a complaint against you even in the jurisdiction where he/she reside or work in any parts of the country it may be and you have to defend your case in that jurisdiction. Any aggrieved patient can thus more easily drag you to the consumer court seeking hefty compensations in the wake of the above amendments in the new CPA Act. So Being guarded properly is the need of the hour.

The dental and OMFS treatments are considered by the public to be expensive. There has been a significant rise in the litigations in the recent years. The extent of mental stress and trouble and financial strain a litigation gives a doctor is unimaginable. Considering the vulnerability of our profession it is a must to have a good Professional Indemnity insurance which takes care of your entire legal needs and gives you total relief and peace of mind.

Taking all this into consideration, to equip and safeguard our members against any professional legal issues, AOMSI is launching soon in March 2022, a tailor-made Professional Indemnity insurance scheme **exclusively for its members** at a highly discounted rates when compared to other existing Indemnity insurance schemes.

AOMSI Professional Indemnity Scheme (PIS)

- Answers for mindroid will be revealed on our social media handles along with a shout out to those who send in correct answers.

TALENT CORNER

poetry

A Surgeons Perspective....

When there's a tooth that has to go...
I eliminate pain with extraction and lo..
I see him smile....

When there's an ulcer that doesn't heal
I knife the blade ,cut and close..
I see him smile

When there's a cleft in the open
I reconstruct to mend ...the palate and lip..
Make the mouth pleasant ...
Help them eat and chew ...give back a smile..

When there's broken bones in face and jaws
I fix them with plate and screws..
I wire their teeth..
Bring them back to position...
I see him smile

When there's cyst on the jaws..
I open and pack...to shrink and heal
I see him smile.

When there's a tooth that's missing ..
I tend to implant..give back the tooth...
With same color and form...
I see him smile...

I am a smile restorer..
Donot shudder at the name of surgery of face..
I am gentle,skilled and artistic..
With a mission to heal
Face and jaws..
I am an oral and maxillofacial surgeon

Dr. R.M.Lalitha (LM 6737)
